SUMMARY

Software Engineer with 5+ years of experience building production web applications using Angular, React, TypeScript, JavaScript, C#, ASP.NET Core, .NET Core, ASP.NET MVC and SQL. Strong background in full-stack development, frontend architecture, REST API integration, database performance, CRM integrations, legacy system modernization and business application development. Experienced delivering scalable web platforms from concept to deployment in startup, corporate and client-facing environments. Skilled in using AI-assisted development tools such as Google Antigravity and Cursor to accelerate coding, refactoring, debugging and software delivery workflows.

Best Practices for Software Development

EXPERIENCE

SOFTWARE ENGINEER

2022 – Present

TripleCyber Corporation

- Developed and deployed 12+ business-critical web modules using Angular, React, ASP.NET Core, C#, TypeScript and SQL, supporting scalable internal and client-facing applications.
- Improved application performance by approximately 25–35% across key workflows by optimizing frontend rendering, backend logic, API calls and data handling processes.
- Mentored 2–3 junior developers on coding standards, architectural patterns and technology usage, helping reduce repeated code review issues by approximately 30%.
- Supported 20+ production releases and completed 100+ development tasks in Agile/Scrum environments, collaborating with technical and cross-functional stakeholders.

SOFTWARE DEVELOPER

2021 – 2022

Solvex Dominicana

- Optimized SQL queries, data access patterns and application logic, improving data retrieval performance by approximately 30–40% in key business workflows.
- Built and maintained dynamic business web applications with React, Angular and ASP.NET Core, delivering 8+ production features across internal and client-facing systems.
- Migrated 4+ legacy modules to modern web technologies, improving scalability, maintainability and long-term support for business-critical applications.

- Integrated Microsoft Dynamics CRM with custom web applications, supporting 5+ business processes with more reliable synchronization and reduced manual data handling.

SOFTWARE DEVELOPER

2019 – 2021

Freelance

- Delivered 10+ custom web projects for clients using React, Angular, ASP.NET Core, C#, JavaScript and SQL, covering full-stack development from requirements to deployment.
- Built WordPress websites with custom themes, plugins and performance improvements, increasing page performance by approximately 20–30% in optimized projects.
- Managed project delivery from concept to launch, keeping more than 90% of projects within agreed timelines through clear requirements, development planning and post-launch support.

PROJECTS

AR MANAGEMENT SYSTEM | Built a web-based management system for hotel sales, reservations, discounts, commissions and payroll reporting, automating 6+ operational workflows and reducing manual commission calculation work by approximately 60%.

VISIT APP | Developed a visitor access platform for multiple residential projects, supporting resident requests, security approvals, visitor tracking and 1,000+ centralized visitor records with structured visitor data.

DOMAINS APP | Built a domain management platform supporting 100+ domain records, including domain search, purchase, renewal, DNS settings, ownership management and marketplace functionality.

TECHNICAL SKILLS

Frontend: Angular, React, TypeScript, JavaScript, HTML5, CSS3, Responsive Web Applications, SPA Development

Backend: C#, Node.js, ASP.NET Core, .NET Core 3+, ASP.NET MVC, REST APIs

Database: SQL, Query Optimization, Database Performance, Reporting, Data Retrieval

Tools & Practices: Git, Agile, Scrum, Code Reviews, Code Standards, Architecture Patterns, Performance Optimization

AI-Assisted Development: Google Antigravity, Cursor, AI-Powered Code Generation, Code Refactoring, Debugging Support

Business Applications: Microsoft Dynamics CRM Integration, Custom Web Applications, Legacy System Migration, WordPress, Custom Themes, Custom Plugins

Languages: Spanish — Native | English — Professional Working Proficiency

LEADERSHIP & COMMUNITY

KKCoding Discord Community — Admin Facilitate coding discussions, project idea exchanges and career conversations for developers focused on software improvement and professional growth.
